

## Press Release

### AutoForm Continues Global Growth Strategy

**Wilén b. Wollerau, Switzerland, October 9, 2018: AutoForm Engineering GmbH, the leading supplier of software solutions for the sheet metal forming industry, has opened new subsidiary offices in Sweden (Stockholm) and the Czech Republic (Prague). With these new offices, AutoForm will be able to collaborate much closer with its customers in both regions and serve their needs first hand.**

AutoForm has successfully grown its business in Scandinavia and the Czech Republic over the last two decades. Its team in The Netherlands has been serving both markets directly from the office in Krimpen a/d IJssel. The Scandinavian market, which covers Denmark, Norway and Sweden, includes important automotive OEMs and suppliers such as Volvo Cars, Volvo Trucks, Scania and SSAB. Since 2005, AutoForm has also been serving the Czech Republic market through a local representative in Prague, providing its software to leading automotive manufacturers and suppliers such as Skoda, Volkswagen, Porsche, Benteler Automotive, MAGNA and Tower Automotive.

The growing demand for AutoForm software and services in both regions has clearly shown that opening new offices and having additional experts in sheet metal forming on site, will benefit both AutoForm and its customers. The proximity of AutoForm to its customers in these regions means AutoForm's expertise in sheet metal forming is available to them in their local environment and in their local language.

Marc Lambriks, General Manager at AutoForm Engineering, The Netherlands, stated: "I am pleased that we have opened two new offices in Stockholm and Prague. These locations will enable us to be closer to our customers in Scandinavia as well as in the Czech Republic in order to serve their needs first hand. With these new offices, AutoForm expands its activities and strengthens its presence in both regions."

#### **About AutoForm Engineering GmbH**

*AutoForm offers software solutions for the die-making and sheet metal forming industries along the entire process chain. With over 350 employees dedicated to this field, AutoForm is recognized as the leading provider of software for product manufacturability, tool and material cost calculation, die face design and virtual process optimization. All of the Top 20 automotive OEMs and most of their suppliers have selected AutoForm as their software of choice. Besides its headquarters in Switzerland, AutoForm has offices in Germany, The Netherlands, France, Spain, Italy, Czech Republic, Sweden, USA, Mexico, Brazil, India, China, Japan and Korea.
